

User Story #29 – Login & Registration

As an assessor I can verify the use of a **role-based login and registration functionality** so that a pass grade may be awarded.

Role-based login

The screenshot below shows how user 'johnwalshe' has staff status. While other users do not. By having staff status only 'johnwalshe' can enter the admin area.

Action:

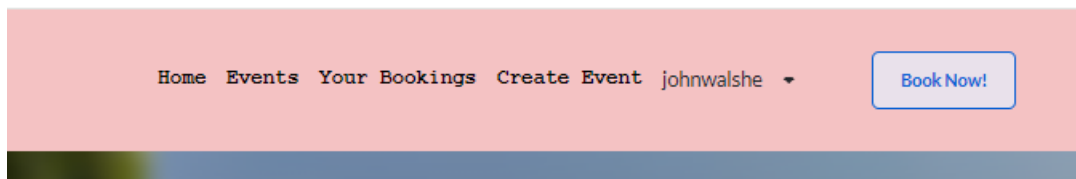

Go

 0 of 4 selected

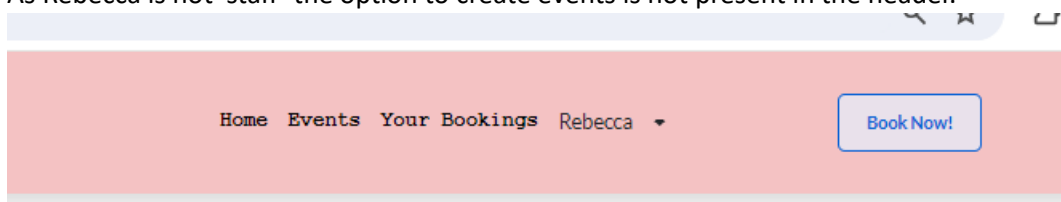

<input type="checkbox"/>	USERNAME	EMAIL ADDRESS	FIRST NAME	LAST NAME	STAFF STATUS
<input type="checkbox"/>	elas	walshejohnnyw7@gmail.com	Elsa		✖
<input type="checkbox"/>	Jessica	jessie@hotmail.com			✖
<input type="checkbox"/>	johnwalshe	walshejohnnyw7@gmail.com			✔
<input type="checkbox"/>	Rebecca				✖

4 users

Only 'staff' can create and edit events. See in the image below johnwalshe can create and edit events as he is a staff member.

As Rebecca is not 'staff' the option to create events is not present in the header.

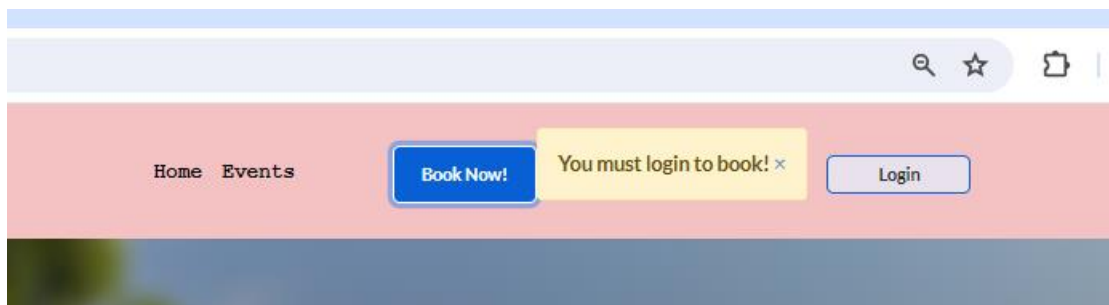

Additionally, Rebecca cannot edit an event as she is not designated staff status.

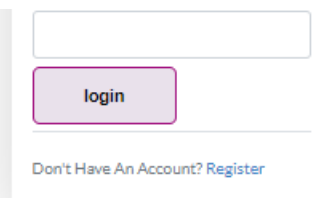

Registration Functionality

Test: Click 'Book Now' button as unregistered user.

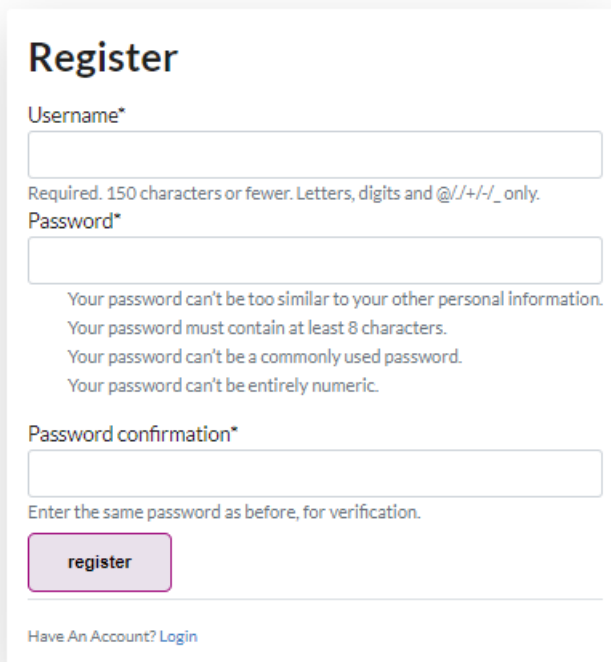

Outcome: A flash image presents telling the user they must login to book

The user is then automatically redirected to the login page, where a message saying 'don't have an account? Register' is shown. The user knows he/she must register to login and can proceed.

Upon clicking 'Register' the user is brought to the registration page.

Register

Username*

Required. 150 characters or fewer. Letters, digits and @/!+/_ only.

Password*

Your password can't be too similar to your other personal information.
Your password must contain at least 8 characters.
Your password can't be a commonly used password.
Your password can't be entirely numeric.

Password confirmation*

Enter the same password as before, for verification.

register

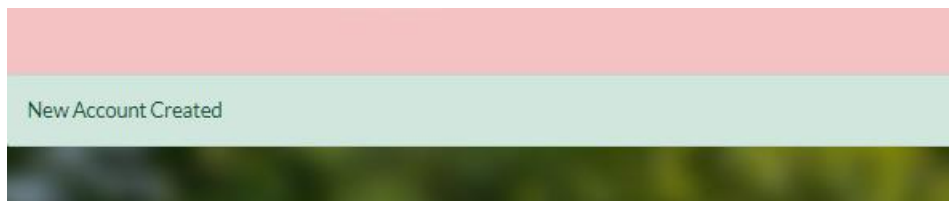

Have An Account? [Login](#)

Test: Input Testperson1 with password &p34K_(8*

Outcome:

Bug: the password feedback info is not updating

A green flash message presents telling the user their registration has been successful

The new users name is presented in the top right of the footer

As a registered 'logged in' user the new user can now create a booking.

Create New Booking

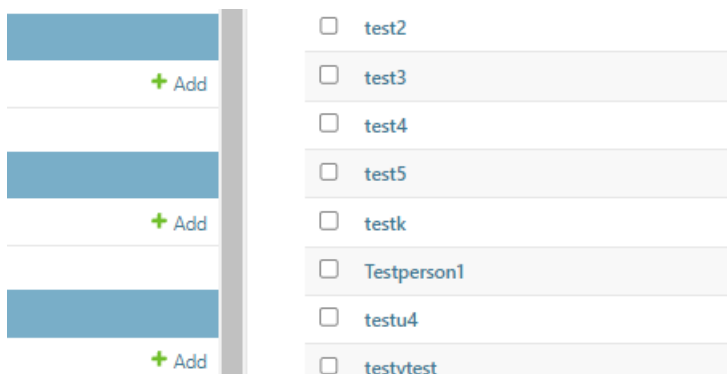

Booking date:

Location:

Guest number:

Message:

The new user can be found in the Django admin – which relates to the database

As a logged in user I wish to book an event by using the browser. This test also covers as a tester I can see evidence of CRUD

Test: Click 'Book Now!' button as a logged in user.

Outcome: User is taken to the 'Create New Booking Page'

Create New Booking

Booking date:

Location:

Guest number:

Message:

I input the following information and then pressed submit

Create New Booking

Booking date:

Location:

Guest number:

Message:

This is a test

A green success message appears saying 'New booking created'. The booking is also displayed in the 'booking page' on top of the list of other bookings.

New booking created

Guest Numbers: 22

Message: This is a test. Updating this is a test message content.

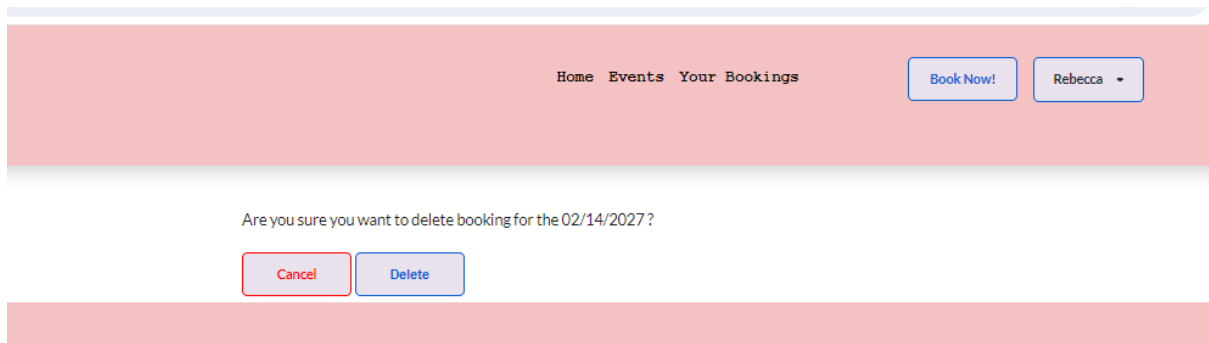

Edit

Delete

As a user I would like to be able to delete my booking.

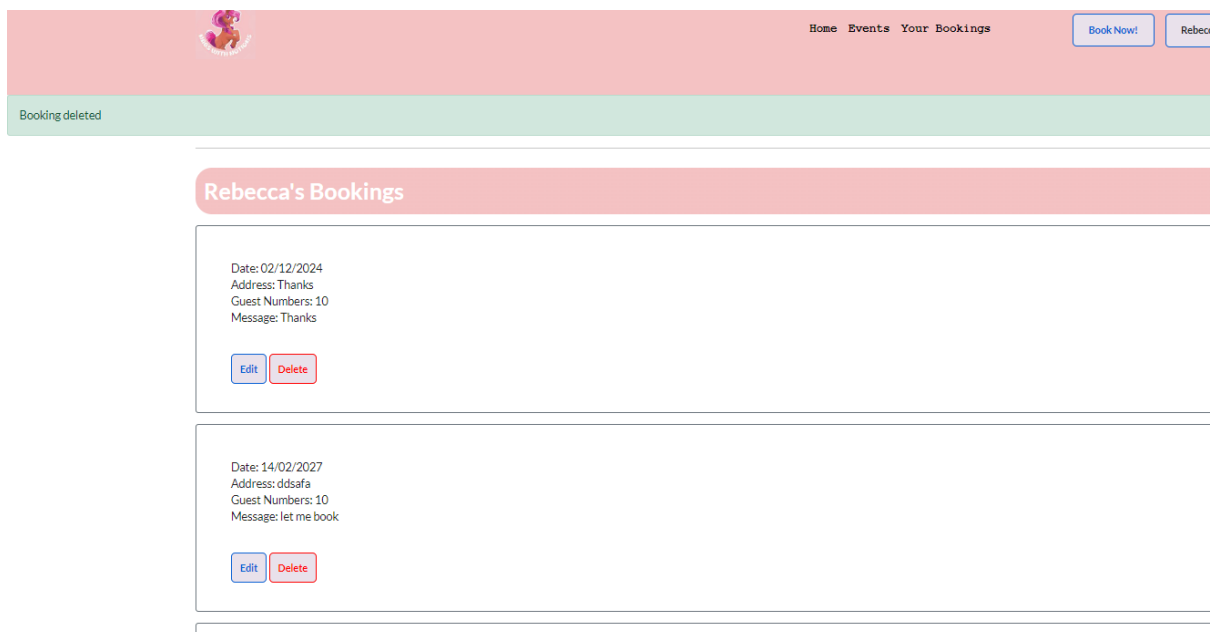

Test: Click the delete button.

Upon clicking the delete button the user is given an option as to proceed. The booking date is used for reference.

Clicking the cancel button brings the user back to the bookings page and all bookings are still present.

However, clicking the delete button here presents the user with a 'Booking deleted' image and the booking is no longer present in the users 'bookings'. The booking instance has also been removed from the database.

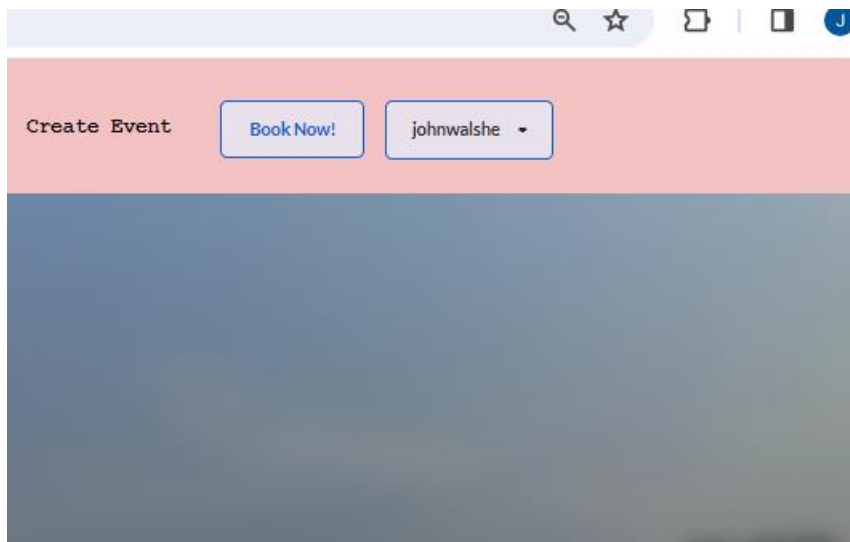

Testing 'Create Event'

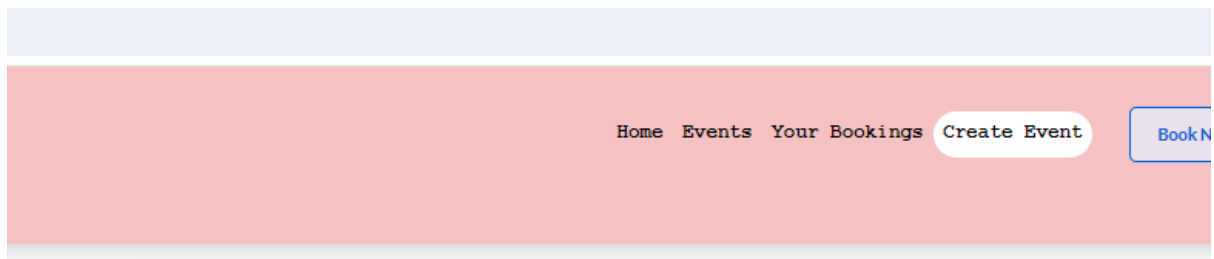

As an admin I want to be able to add events that users can view

Test: Login in as a user with Admin status and expect to see a 'create event' option in the header.

Outcome: The 'Create Event' button is present as expected

As expected clicking the 'create event button' brings the admin to a create event page

Add Event

Author*

Title*

Content*

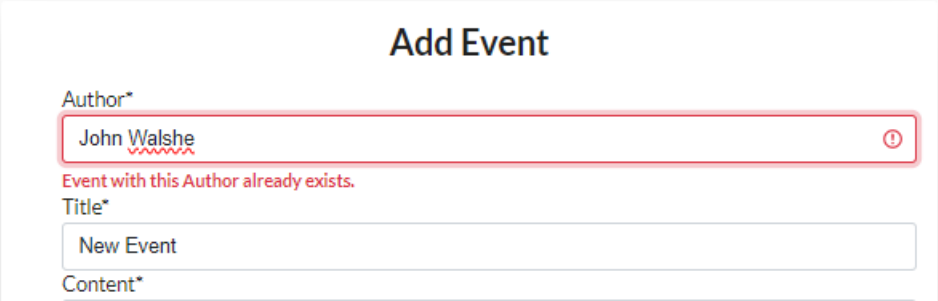

Choose File No file chosen

Submit

The following form was submitted. It was expected that the admin would see this event, with the image in the 'Events' section.

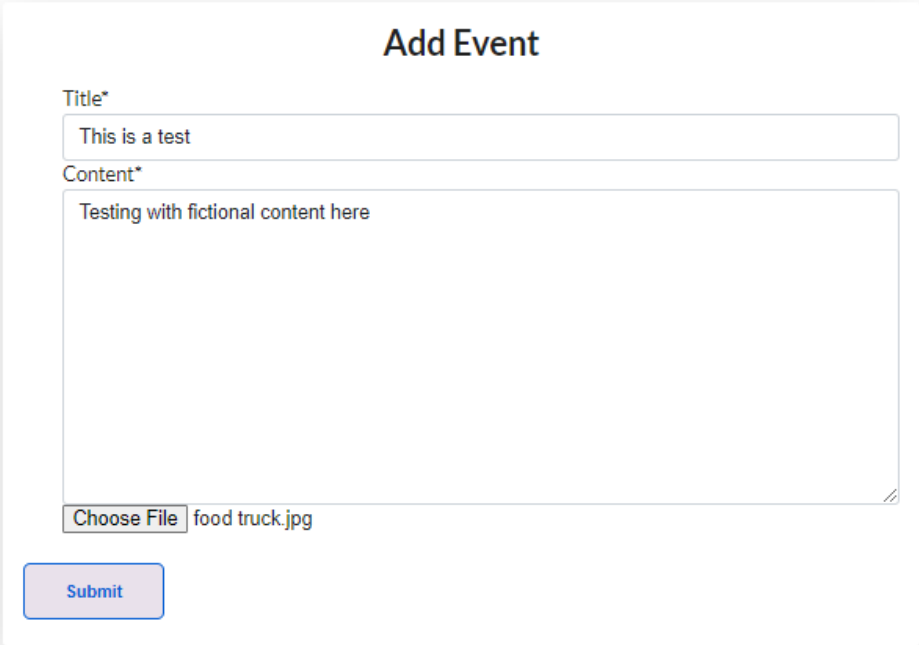

Outcome:

This is a bug, as the author should be able to make more than one event.

The screenshot shows a web form titled "Add Event". It has three input fields: "Author*", "Title*", and "Content*". The "Author*" field contains the text "John Walshe" and is highlighted with a red border and a red error icon. Below it, a red message reads "Event with this Author already exists." The "Title*" field contains the text "New Event". The "Content*" field is empty. The form is set against a light gray background.

The author field was removed. This form was then submitted.

The screenshot shows the "Add Event" form after the "Author*" field has been removed. It now has two input fields: "Title*" and "Content*". The "Title*" field contains the text "This is a test". The "Content*" field contains the text "Testing with fictional content here". Below the "Content*" field, there is a "Choose File" button and the text "food truck.jpg". At the bottom left, there is a "Submit" button. The form is set against a light gray background.

Outcome: Test failed. The event was not submitted. The page just returned to the same page. Upon further investigation the removal of the 'status' field from the event entry form caused the error. Returning this field corrected this issue.

Add Event

Title*

test

Content*

This is test content in the event form

Choose File

food truck.jpg

Draft

Submit

As expected the event image presents. However the image is too wide. Col-8 offset-2 from bootstrap fixed this

Author:

test

This is test content in the event form

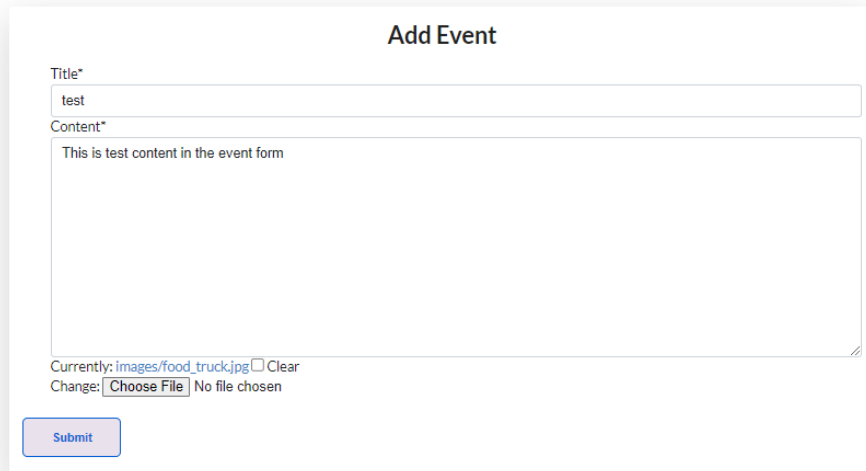

Feb. 17, 2024, 8:48 p.m.

Update

Delete

Test: Click the events update button. Expected outcome. Superuser redirected to event form.

As expected the superuser is brought to the Add Event form with the previous detail present.

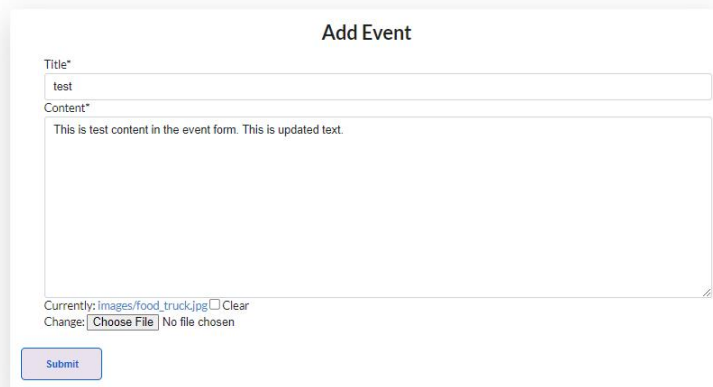

Add Event

Title*
test

Content*
This is test content in the event form

Currently: [images/food_truck.jpg](#) ☐ Clear
Change: No file chosen

Add Event

Title*
test

Content*
This is test content in the event form. This is updated text.

Currently: [images/food_truck.jpg](#) ☐ Clear
Change: No file chosen

Test. 'This is updated text' is entered into the content section. Outcome: As expected, the updated text is present and the user is redirected to the events page. BUG However the 'clear' button does not work for the current image and a new image cannot be uploaded. By inserting crispy forms a red warning appears

Event image
Currently: [images/food_truck.jpg](#) ☒ Clear
Change: No file chosen
Please either submit a file or check the clear checkbox, not both.

If the user deletes an image and submits this then the image is deleted. Once deleted the user can edit the image again and put in a new image.

Below is the image erased

Author:
test

Feb. 17, 2024, 8:48 p.m. This is test content in the event form. This is updated text.

New image attached

Event image

```

## Performance

Values are estimated and may vary. The [performance score is calculated](#) directly from these metrics. [See calculator.](#)

▲ 0–49   ■ 50–89   ● 90–100

### METRICS

[Expand view](#)

■ First Contentful Paint

1.0 s

▲ Largest Contentful Paint

4.8 s

■ Total Blocking Time

● Cumulative Layout Shift

### DIAGNOSTICS

▲ Largest Contentful Paint element — 4,770 ms

▲ Minimize main-thread work — 2.2 s

▲ Properly size images — Potential savings of 4,636 KiB

▲ Reduce initial server response time — Root document took 810 ms

▲ Remove duplicate modules in JavaScript bundles — Potential savings of 11 KiB

▲ Enable text compression — Potential savings of 26 KiB

■ Serve images in next-gen formats — Potential savings of 365 KiB

**Warnings:** Unable to locate resource ...images/snapedit\_170....png

■ Preload Largest Contentful Paint image

Using chrome dev tools and clicking network and then images shows some images are causing long delays. For example the pony soprano image is causing a delay of 718ms. To address this I will use srcset in my html, so different image sizes will render depending on the device size/pixelation requirements.

Name	Status	Type	Initiator	Size	Time	Waterfall
nags-with-notions-logo.png	304	png	(index):45	286 B	122 ms

Garlic-aioi-8.jpg	304	jpeg	(index):340	286 B	32 ms	
chili-honey-dip.jpg	304	jpeg	(index):354	285 B	464 ms	
hero-image-800.png	304	png	style.css	287 B	364 ms	

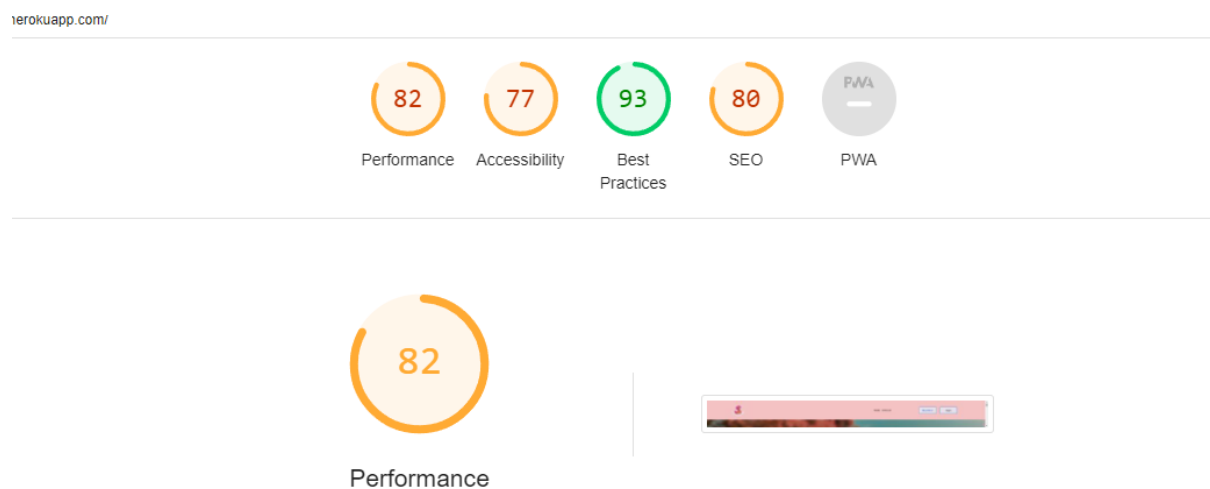

About Us image should initially be 250x300px

Pizza images should have initial size of 420x560px

Hero image should be initially 1800x1000

Upon further investigation it appears the delay for my hero image is largely due to 'server response time' which is related to my hosting. This may be due to using localhost.

Testing on Heroku shows a much better performance

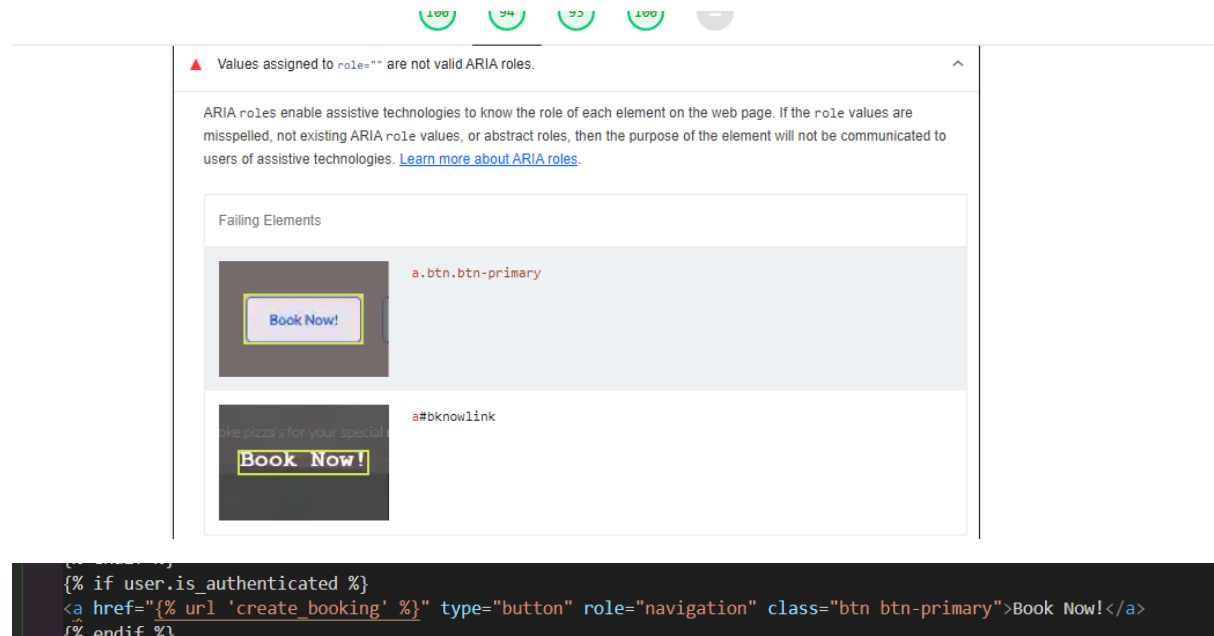

Accessibility Testing

Index page:

Accessibility score 77

I had to put aria labels on some links & improve the contrast between some text and its background. Also had to remove double selectors e.g. having an ID selector and class selector where just a class selector would suffice.

Despite having valid aria roles for both 'book now' buttons they continue to come up as not having valid roles

The screenshot shows a web accessibility checker interface. At the top, there are five circular progress indicators, with the first four being green and the fifth being grey. Below these, a red triangle icon indicates an error: "Values assigned to role="" are not valid ARIA roles." A text box explains that ARIA roles enable assistive technologies to know the role of each element on the web page, and that invalid roles can prevent the purpose of the element from being communicated. Below this, a section titled "Failing Elements" lists two elements:

- a.btn.btn-primary**: A button with the text "Book Now!".
- a#bknowLink**: A button with the text "Book Now!".

Below the failing elements, a code block shows the HTML for the first button:

```
{% if user.is_authenticated %}
Book Now!
{% endif %}
```

All recommendations have now been addressed.

## Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Ipad Pro Using Chrome Extensions

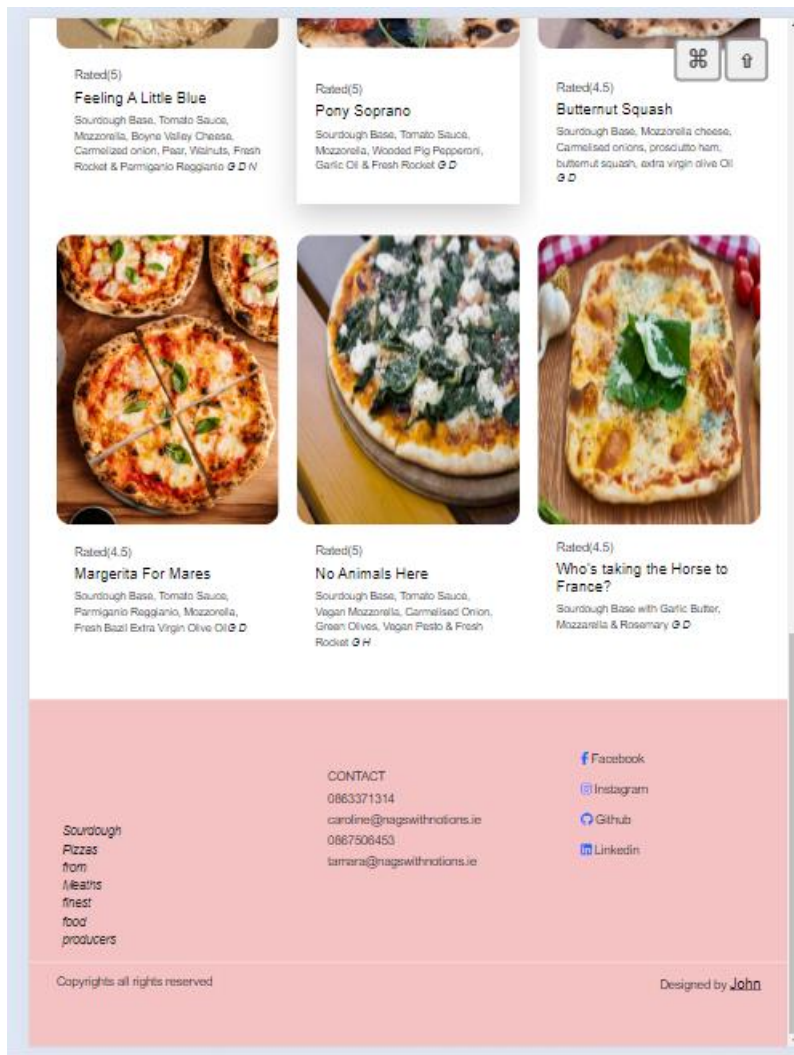

Home Page

About us into menu

Menu into footer: footer logo not displaying and font not consistent.

At this point in testing I realised that the 'pizza' tab wasn't working. This required re-setting the Data-target. I also added some background color to the menu section. The events section seems to have an unnecessary margin above and below the event.

On Sunday

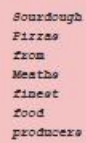

Looks like it's going to  
be perfect pint 🍺 and  
pizza 🍕 weather ☀️

Jan. 29, 2024, 11:57 a.m.

Looks like it's going to be perfect weather for a pint and pizza!fd

Bookings looks fine:

Create event box could probably be wider

Book now box could also be wider/higher

Aranciata

Aranciata Rossa

No need for author title over events image.

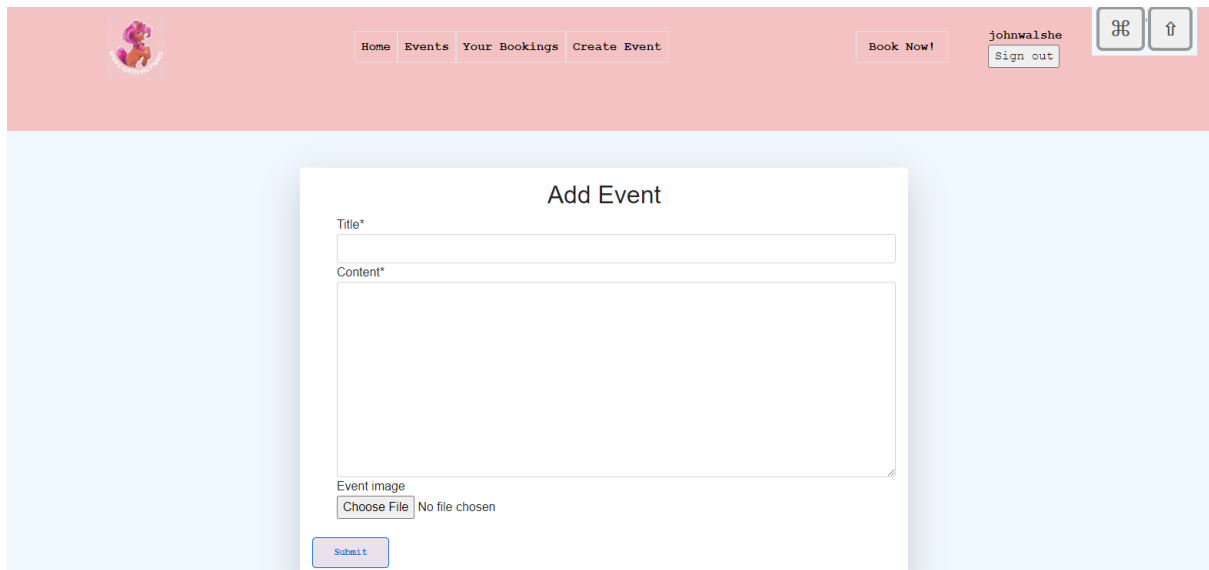

Image appears slightly to left.

Bookings dates in American format

Create event box too narrow

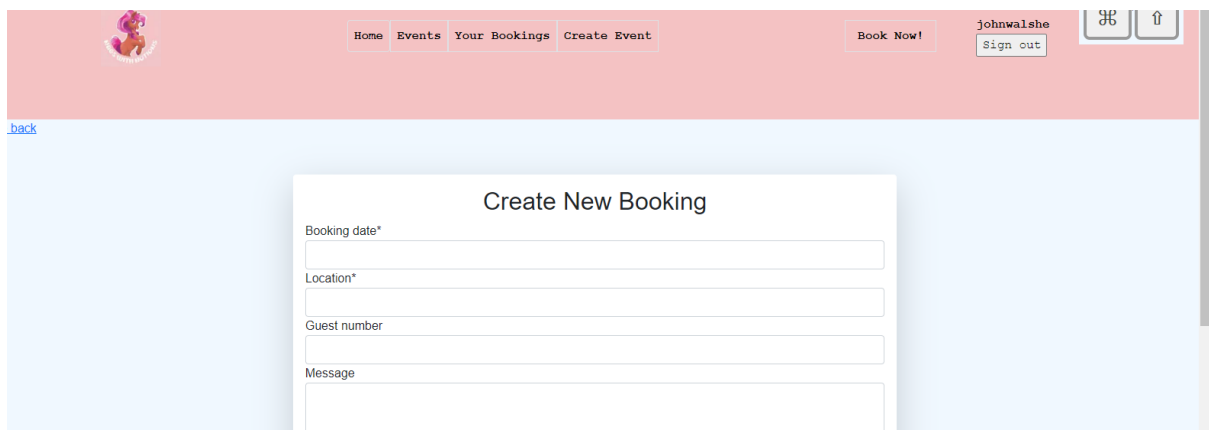

The screenshot shows a web application header with a pink background. On the left is a small cartoon animal icon. In the center are navigation links: Home, Events, Your Bookings, and Create Event. On the right are links for Book Now!, a user profile for johnwalshe with a Sign out button, and icons for a menu and an upward arrow. The main content area has a light blue background and features a white 'Add Event' form. The form includes a 'Title\*' text input, a 'Content\*' text area, an 'Event image' section with a 'Choose File' button and 'No file chosen' text, and a 'Submit' button at the bottom.

Need to remove outer box border on hover of headers

Create booking box too narrow

The screenshot shows the same web application header as before. The main content area has a light blue background and features a white 'Create New Booking' form. The form includes a 'Booking date\*' text input, a 'Location\*' text input, a 'Guest number' text input, and a 'Message' text area. A blue link labeled 'back' is visible on the left side of the main content area.

Message background too strong
